For exhibitors who have acquired activation sponsorships on the exhibition floor, which may involve the use of robots, mascots, or other similar elements, please get in touch with Patricia Horna at atcexpositores@igeco.mx. Obtaining this approval for your activation is essential to ensure that it adheres to the necessary safety regulations and protocols.

The use or flying of drones within the fairground premises is strictly prohibited.

Transportation services

Please take a moment to review the attached documents for detailed information regarding the shipment of goods. It is important to note that shipments should not be addressed to the venue or the Organizing Committee. Neither Poliforum León nor the Organizing Committee will be responsible for signing and receiving shipments on-site.

Security

Starting from Sunday, October 6th at 8:00 AM, the Organizing Committee's security team will assume responsibility for safeguarding the general areas and entrances in 24-hour shifts. The security operation will continue until Saturday, October 12th at 16:00 hrs.

The primary duty of the security personnel is to regulate access and ensure the prevention of accidents and disturbances within the exhibition area. Furthermore, Poliforum will supply security coverage for the exterior areas of the venue.

NOTE:

- Exhibitors are required to maintain custody and control of all their owned property during transportation and throughout the entire exhibition period within the exhibition venue.
- In the absence of the exhibitor from the booth, it is essential to ensure the security and protection of their belongings. It is advised to store small equipment in drawers and securely lock them with reliable locks whenever the booth is unattended, be it during the exhibition, assembly, or dismantling. The removal of exhibited goods is only permitted with authorization from the Organizing Committee. For coordination of these procedures, please approach the security staff.

The security personnel are authorized to conduct inspections of all materials entering or exiting the premises at any time. We kindly request your cooperation with these controls to reduce the risk of theft and losses.

If you believe that your booth requires additional security, we recommend hiring a special security service for your exhibition area. This may include the inventory service for electronic exhibition equipment, which can serve as evidence for potential insurance claims.

It is important to take necessary precautions on-site to ensure the safety of valuable items, including personal computers, cellphones, tablets, portfolios, backpacks, suitcases and similar objects, as these are highly vulnerable to theft. Poliforum's security team offers locks that can be used to secure laptops to the furniture in your booth.

Under no circumstances should emergency exits, fire extinguishers, fire hoses, and aisles be obstructed. It is essential to familiarize yourself with the locations of these points upon your arrival.

Please note that entry to the event with animals and firearms is strictly prohibited.

Recommendations for Industrial Transformation Mexico Exhibitors

- During days of assembly and dismantling, it is advised to avoid bringing laptops, projectors, or other electronic equipment if possible. However, if this cannot be avoided, it is recommended to keep them under constant supervision and take the utmost care. Please be aware that neither the Organizing Committee, the security company, nor the venue itself can be held responsible for any theft, damage or loss that may occur to such belongings.
- During the event days, we will offer security cables for laptops, TVs, and projectors at no extra charge. Nevertheless, it is crucial to note that it remains your responsibility to diligently take care of everything within your booth at all times and in any situation. Please make sure to properly safeguard your belongings and equipment throughout the event.
- It is advised to securely close stands, preferably using fabric or mesh, when leaving the booth during the assembly. Additionally, please inform the security personnel to ensure that no one enters the booth under any circumstances.
- It is highly recommended not to leave cellphones, tablets, personal computers, valuable objects, backpacks and portfolios unattended during the event. We have observed that, due to negligence, these items can be quickly and easily taken. Please exercise caution and ensure the safety of your belongings at all times.
- It is strongly advised to maintain control of money generated from sales at all times. There have been instances where money was stolen due to negligence in selecting an adequate storage location. Therefore, it is crucial to remain vigilant and ensure the secure management of your funds, as they represent the hard-earned results of your efforts.
- If you notice any suspicious individuals or activity near your booth, please report this promptly to the security personnel. They are present to guarantee the safety and security of all exhibitors and attendees. Remaining vigilant and proactive in reporting any potential security concerns is crucial to maintaining a secure environment for everyone participating in the event.
- The exhibitors, the organizing committee and the security company must collaborate to combat theft. It is important to acknowledge that there are, unfortunately, organized groups within venues who specialize in theft. These individuals are professionals who meticulously observe exhibitors and visitors who are not attentive to the security of their belongings. By staying vigilant and taking necessary precautions, we can effectively minimize the risk of theft and establish a safer environment for everyone involved.

Assembly of Heavy Machinery and Equipment

Please ensure that [the machinery exhibition form](#) is completed with comprehensive information about the machines intended for display. This includes details such as the brand, model, dimensions, weights, type of base or attachment, required mode of transportation (e.g., low-boy, flatbed, box), electrical consumption requirements, compressed air requirements, any special handling requests, number of components for each machine, packaging type and whether it necessitates the use of a forklift or crane for handling. Additionally, it is essential to provide a scaled drawing indicating the precise location of the equipment within your stand(s).

If the necessary technical information is not provided by Friday, September 9th, 2024, the Organizing Committee will not be able to include the exhibitor in the regular schedule for assembly and dismantling. If the necessary technical information is received late, the assembly and dismantling services will be treated as special cases. In such situations, the exhibitor will be required to bear the full cost of associated expenses in advance. These expenses may encompass the removal and reinstallation of carpeting, partitions, electrical installations, signage, and other pertinent elements.

IMPORTANT: In the event of technical difficulties or special arrangements cause delayed exhibitors to have an impact on already installed exhibitors who refuse to relocate their equipment, the Organizing Committee cannot assume any responsibility, under any circumstances, for the inability to set up the exhibits of the exhibitor who failed to provide their technical information on time.

Upon receiving completed technical information, the Organizing Committee will carefully review and evaluate it. Based on this analysis, they will establish a schedule for the setup and dismantling process for each exhibitor. The committee will inform each exhibitor about their assigned day, time and duration of these activities.

The scheduled time for each exhibitor is determined based on the "preliminary" technical information provided by each exhibitor on the form. If, on the day of the event, the exhibitor brings a different machine in terms of weight, quantity, type of grip, or if the exhibitor does not indicate in advance that they require equipment for unpacking and/or repacking, the exhibitor will be responsible for covering the cost of any additional time required.

IMPORTANTES NUEVAS REGULACIONES EN MÉXICO PARA IMPORTACIONES PERMANENTES

Nuevo esquema de validación de NOMs de seguridad (Normas Oficiales Mexicanas) en aduanas

A partir de junio de 2019, algunas mercancías no pueden ser importadas en régimen definitivo sin prueba del cumplimiento de las NOMs de seguridad en el punto de entrada al país.

Principalmente dispositivos electrónicos como computadoras, televisores, lámparas, impresoras, tabletas y otros accesorios de red; no tienen problema en importación temporal, pero para régimen permanente debemos cumplir con las certificaciones de importación por producto, marca y modelo.

NAIB no tiene ninguno de estos permisos o certificaciones, ya que no somos vendedores ni distribuidores.

Es importante identificar los códigos HS. Por lo tanto, solicitamos un CIPL con la siguiente información, para aprobar una importación permanente:

- Descripción del Producto
- Códigos HS sugeridos
- Precio por ítem

New validation scheme of security NOMs (Official Mexican Standards) in customs

Beggining of June 2019, some goods cannot be imported under a definitive regime without proof of compliance with security NOMs at the point of entry into the country.

Mainly electronic devices like computers, TV's, lamps, printers, tablets and other network accessories, don't have problem doing temporary import but for permanent status we need to comply with import certifications per product, brand and model.

NAIB doesn't have any of these permits or certifications, since we are neither sellers or distributors.

It is important to identify HS Codes. Therefore, we request a CIPL with the following information, in order to approve a permanent importation:
